## ABOUT ME

From the moment I produced "Hello World" in the console of my first application, I knew I was hooked into the world of software development. But coding has never been "just a job" for me, it gives me freedom and makes me creative. It offered an engaging challenge to continually learn and improve my skills.

## PROJECTS

### Stock Price Alert —

<https://github.com/Ameen-Here/100DaysOfCode/tree/main/Day%2036%20Stock%20Market%20Alert>

Created a project using python, which will send sms to the user phone when their selected stock price has increased/decreased a certain percentage in their stock price. The sms will also have the latest 3 news regarding the companies. This is mainly done through API integration and a little python scraping.

### Workout Tracker—

<https://github.com/Ameen-Here/100DaysOfCode/tree/main/Day%2038%20Workout%20Tracker>

Created a workout tracker using python. The application will ask the user to input the workout done and duration in sentence, uses an api which is specialised in natural language processing, will convert the workout and will be added to an excel sheet. This can be used to convert into a github tracker like GUI.

### Ping Pong Game—

[https://github.com/Ameen-Here/100DaysOfCode/tree/main/Day22\\_ping\\_pong\\_game](https://github.com/Ameen-Here/100DaysOfCode/tree/main/Day22_ping_pong_game)

Created a ping pong game using python turtle module. All done from scratch, and my very first GUI based game project. Used OOPS concept so that almost every part of the game is easily customisable. Used inheritance to work seamlessly.

## SKILLS

Python	★★★★★
C++	★★★★
HTML	★★★★
CSS	★★★★
Java	★★★

## ACHIEVEMENTS

Got funded in a seeding process for a startup (AirBots) that I co-founded.

Contributed in a open source project (AinaBot)

Community member at EddieHub

## EDUCATION

**Bhavans Vidya Mandir, Chithali — +2 HSS**

2017-18

Stream:Computer Stream

CGPA; 79%

## LANGUAGES

Proficient in English, Malayalam and Hindi
